DEC Memo: "Prior to Sept, 2004 data translation this spill Lead\_DEC Field was VOUGHT 3/13/03 REASSIGNED FROM ROMMEL TO VOUGHT. 6/23/2003-Vought-File review by Vought: Tank Closure Report-May 1998-Tyree Brothers Environmental Services (Paul Hatcher-631-249-3150)-Excavation and removal of twelve (550-gallon) gasoline, one (2000-gallon) gasoline, one (550-gallon) fuel oil and one (550-gallon) waste oil UST. Residential to the south and vacant lot to the west. Fifteen endpoint soil samples taken (analyticals provided). Soil analyticals show concentrations up to 351 ppb benzene and 3100ppb MTBE. 165.04 tons of soil were removed from Site (disposal manifest provided). Subsurface Investigation Report-December 2000-Tyree-Nine Geoprobe borings performed. Groundwater at 9' below grade. Soil analyticals show concentrations up to 350ppb benzene, 36.7 ppb MTBE, 11400ppb naphthalene and 8300ppb chrysene. Groundwater concentrations up to 66.2ppb benzene and 25ppb MTBE. Quarterly Monitoring Reports-June 2001 thru Feb 2002. Groundwater analyticals show parameters below method detection limits (below TAGM groundwater standards). Historical Data Compilation-Dec 2001-Tyree Quarterly Monitoring Reports-Tyree-Mar 2002 thru Feb 2003-Four monitoring wells on-site. Groundwater analyticals show

parameters below method detection limits. No Further Action Request-Feb 2003-Tyree 6/23/2003-Vought-site review with NYSDEC Rommel. NFA request denied. NYSDEC requires 1)well construction logs (well MW-2 shows non detect despite upgradient soil contamination in SB7 of 351ppb benzene and 310099b MTBE) 2)downgradient probe or site map location correction of MW4 so that downgradient soil and groundwater can be investigated (due to 8300ppb chrysene in SB2). 3)what is the current on-site use of property (unpaved or paved which may affect infiltration through heavily contaminated areas). 6/27/2003-Vought-Received boring proposal for one additional boring downgradient of W3. Vought sent letter approving of boring and additional requirements discussed on 6/23. 9/25/2003-Vought-Subsurface Investigation Report-8/1/03-Tyree Org (David Pachan-518-786-3200). One soil boring was performed on 6/26/03 downgradient of W-3 to a depth of 12'. Soil sample submitted for analyses was just above water table and groundwater sample also submitted for analyses. Groundwater present at depth of 10'. Tyree requests No Further Action. Vought-Soil analyticals indicate minor PAH exceedance (benzo(a)pyrene at 76.9ppb) with all BTEX below method detection limits (which were all below TAGM Groundwater Standards). No BTEX and MTBE exceedances since 8/01. Vought called David Pachan for future use of site due to soil contamination. Pachan will return call to DEC. Pachan returned call and future use of site will be continuation of service station. Vought reviewed file with DEC Rommel and DEC requires well construction logs of W-2 and EPA Method 8270 analyses on W-4. 9/25/2003-Vought-Received well construction logs of W-2 and well is screened from 2 to 22 . Method 8270 analyses were performed on all wells and W-4 showed no TAGM 4046 Required Soil Cleanup Objective exceedances. Spill closed by Vought. "

Remarks: "CONTAMINATED SOIL ENCOUNTERED WHEN PULLING TANKS ORIGINAL SPILL ASSIGNED TO O'DOWD."

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.
